

Toxicology Today

Attached are references for articles interest to AACT members. These articles were indexed on PubMed between 3/31/19-4/6/19. Our aim is to put out a reference list of interest every 2 weeks. The first group is based upon the terms: **poisoning, antidote and overdose** the second set is based upon the terms: **chemically induced, adverse reactions, medication errors and drug interactions**. In this group I also included some references related to the use of marijuana and he impact on opioid prescribing/use/abuse search was for **opioids OR opiates AND cannabis OR marijuana**. Not every article meeting these terms is listed, but the ones that would appear to be of most interest are included. Please forward any constructive comments to Bruce Ruck at ruckbe@njms.rutgers.edu.
