## CONFERENCE

The North American Congress of Clinical Toxicology (NACCT) is the largest clinical toxicology meeting in the world. This event provides ongoing education in clinical toxicology for more than 700 of the world's leading clinicians, scientists, poison center staff, and executives. Attendees include clinicians and research scientists from poison centers, industry, academia, and regulatory agencies.

## ACMT Pre-Meeting Symposium, September 23, 2019

Session organizers: Andrea Carlson, MD • Christina Hantsch, MD  
Andrew King, MD • Daniel Sessions, MD

### Music City Mixology: The High Notes and Low Notes of Booze and Drugs

Perhaps nothing is as germane to toxicology as "mixing." The ACMT Pre-Meeting Symposium is a concocted potable pairing of toxicity, addiction, and withdrawal with music and cocktails to engage all of your senses for a truly memorable experience. Some topics will be explored in detail and others will whet your appetite for the rest of the NACCT. Join us as we get to know some new friends - vaping, marijuana and nicotine cocktails, adverse effects of addiction treatments - and catch up with some older acquaintances - absinthe, cinchonism, methamphetamine, and toxic alcohols. Come for the toxicity; you'll want more and need to stay for the withdrawal! Are you in for "the Mix"?

## AACT Pre-Meeting Symposium, September 24, 2019

Session organizers: Jillian Theobald, MD, PhD • Kennon Heard, MD, PhD

### Toxicologist versus Terrorist: Preparing for the Worst Call

Jack Bauer, Jack Ryan, Carrie Mathison could have used a well-trained toxicologist by their side. When the next terrorist attack occurs, toxicologists will likely be among the first medical providers contacted. The objective of this presymposium is to provide you with the information required to recognize and manage chemical, biological, and radiological attacks. These high-intensity, 30 minute countdown sessions will be case-based and rapid paced. Chemical weapons will be covered in detail, while the other topics will focus on early identification. Supporting materials will cover standard and alternative treatments, with relevant stockpile and resource availability detailed. Toxicologic implications of current and potential biological weapons will also be covered. Finally, we must prepare for appropriate risk communication to minimize mass hysteria. The fascinating day will culminate in a doomsday discussion focusing on the greatest threats.

### NACCT MOBILE APP:

The mobile app for NACCT 2019 is ready to download to your iOS or Android mobile device! The app can be downloaded from the Apple Store or Google Play markets. Simply search "Crowd Compass Attendee Hub", download, and install - it is that easy! If you have a previous version of the Attendee Hub app from a prior NACCT meeting, tap the "settings" icon on your device, and select, "Back to All Events". Then, select "NACCT 2019" from the list. Make sure to enable push notifications after you download the NACCT 2019 content in the app. Push notifications provide up-to-the-minute alerts of upcoming events, deadlines, and specific meeting information, both before and during the NACCT conference.

The URL for the mobile app is <https://crowd.cc/nacct2019>

## Main Congress, September 25 - 27, 2019

### 2019 NACCT Objectives

List challenges facing Poison Centers and clinical toxicologists in their roles related to radiation emergencies.

Identify the complex and diverse needs of populations with different social and cultural realities.

Compare different approaches to the diagnosis of complex poisoning cases based on limited data.

Identify the effects of maternal drug use during pregnancy on children.

Contrast the different therapies that can be used to treat the cardiovascular effects of cardiac medications.

Identify xenobiotics that interfere with cardiac ion channel activity.

Identify currently available testing options in personalized medicine, including pharmacogenomics.

Discuss exposure routes and absorption for fentanyl, fentanyl analogs, and synthetic cannabinoids.

Develop an evidence based approach to the treatment of patients with APAP overdose.

Identify barriers and solutions to promote women in toxicology.

## Conference Highlights:

**Pre-Meeting Day 1: Music City Mixology** - Will start with learning the neurophysiological changes of addiction and the risks and benefits in the treatment of addiction and withdrawal. This will be followed by updates on vaping, marijuana and nicotine, and a revival of proven poisons such as absinthe, cinchonism, methamphetamines and toxic alcohols.

**Pre-Meeting Day 2: Toxicologist vs Terrorist: Preparing for the Worst Call** - Is a day of education that is critically important in our modern day. There will be expert discussion on standard and alternative treatments of chemical attacks; biological warfare including weaponized genomic editors; radiation effects by a REAC/TS expert; and communicating with the masses.

### Main Congress:

- A deep dive on the mechanisms of chemical weapons and toxicity from pesticides
- New! Diversity and Inclusion in Toxicology: Women in Toxicology
- Updates on CBD products that are growing in every convenience store
- The truth about environmental exposure to fentanyl and synthetic cannabinoids that every clinician needs
- An evidence-based reviews of activated charcoal for gastrointestinal decontamination
- A Poison Center response to a radiation incident
- New knowledge in the battle with acetaminophen toxicity
- The effects of prenatal addiction on postnatal development
- Learn how toxins prevent us from channeling our inner ions
- Antidotes and supportive care you need when caring for a critically ill poisoned patient
- Prepare for perfection on your next Medical Toxicology LLSA examination!
- There will be a special site for those interested in toxicology fellowships to network with multiple programs

#NACCT2019

# North American Congress of Clinical Toxicology

*Nashville*

Renaissance Nashville Hotel • September 23-27, 2019

## ACMT Pre-Meeting Symposium, September 23, 2019

### Objectives

- Describe neurophysiologic changes in addiction.
- Compare the pros and cons of various pharmacotherapies in the management of addiction and withdrawal syndromes.
- Discuss current trends in substance delivery including cocktail infusions and vaping. Use data from recent international outbreaks to discuss advances in care or modifications in management options of toxic alcohols.
- Explain current methamphetamine-related cardiac issues.

## AACT Pre-Meeting Symposium, September 24, 2019

### Objectives

- Compare chemical weapons and explore the potential targets in local areas.
- Summarize the scope of atropine treatment and atropine alternatives.
- Describe the specifics of oxime treatments.
- Recite the scale of the Strategic National Stockpile.
- Classify the different vomiting agents.
- Explain and treat cyanide and hydrogen sulfide gas exposures.
- Give examples of terrorist gas exposures other than cyanide or H<sub>2</sub>S gases.
- Outline the vast number of biological agents that can be weaponized.
- Name the genome editing tools with the ability to alter gene expression.
- Detail radiation injury in the context of terrorist attacks.
- Develop a method for risk communication.
- Respond to a mass hysteria event.
- Discuss the greatest toxicological terrorist threat.

September 26 • 6:30pm - 10:30pm • \$100.00pp

### Tin Roof on Broadway

is a live music venue downtown right on Broadway! This two level 8500 square foot venue features a stage on the main floor greeting you as you walk in with an open air patio on the second floor overlooking Broadway. This is a great honky tonk with a fun atmosphere that will have

everyone feeling like a local. With acclaimed chef Will Zuchman crafting a one of a kind eclectic menu, music is not all that you will find at the roof. Conveniently located within walking distance of Nashville's best hotels and the Music City Center, Tin Roof is the perfect choice to kick back, relax and enjoy what makes Nashville so special!

KEYNOTE SPEAKER:

## William C. Moyers

September 25, 8:30am - 9:30am

# BROKEN: MY STORY OF ADDICTION *AND* REDEMPTION

William C. Moyers has spent his career helping people who are just like him. People who struggle to overcome the deadly grip of addiction to dangerous substances. He uses his own life's experiences to highlight the power of addiction and the promise and possibility of recovery from it. As a national advocate for the renowned Hazelden Betty Ford Foundation, Moyers carries the message of hope, help and healing to audiences everywhere and has appeared on Oprah, Larry King Live, Good Morning America and National Public Radio. His memoir has been a New York Times best-seller. Now he shares his story with us, but does so in the context of the opioid epidemic that has affected everyone. Moyers offers his insights in how best to help somebody access treatment, what to look for in considering treatment options and what it really means to recover from this chronic illness.

## CONTINUING EDUCATION CREDIT

### Satisfactory Completion

Learners must complete an evaluation form to receive a certificate of completion. Your chosen sessions must be attended in their entirety. Partial credit of individual sessions is not available. If you are seeking continuing education credit for a specialty not listed below, it is your responsibility to contact your licensing/certification board to determine course eligibility for your licensing/certification requirement.

### Physicians / Pharmacists

In support of improving patient care, this activity has been planned and implemented by Amedco LLC and American Academy of Clinical Toxicology. Amedco LLC is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.

Credit Designation Statement – Amedco LLC designates this live activity for a maximum of 26.00 AMA PRA Category 1 Credits™ for physicians and 26.00 of knowledge-based contact hours for pharmacists. Learners should claim only the credit commensurate with the extent of their participation in the activity.

Application for nursing credits has been submitted to the California Board of Nursing. Credit hours are preliminary and subject to final approval.

**NOTE to Pharmacists:** The only official Statement of Credit is the one you pull from CPE Monitor. You must request your certificate within 30 days of the activity to meet the deadline for submission to CPE Monitor.

The AACT reserves the right to adjust the maximum number of hours available pending changes in the program schedule. NOTE: Shaded areas indicate concurrent sessions.

## AAPCC PUBLIC EDUCATION TRACK

### “Question, Persuade, Refer: A Training to Recognize and Respond to Signs of Suicide”

Understanding basic facts about suicide, proven strategies to reduce suicidal behaviors, and accurate non-stigmatizing verbiage around the topic is a first step in preparing to integrate suicide prevention into poison prevention education and messaging. The QPR mission is to save lives and reduce suicidal behaviors by providing innovative, practical and proven suicide prevention training. This evidence-based training course teaches individuals how to recognize the warning signs of suicide, common causes of suicidal behavior, offer hope to people in crisis, and get help to save a life. It is suitable for people with little to no mental health background. QPR training provides a foundation for educators and other poison center job roles. QPR meets the requirements for listing in the National Registry of Evidence-based Practices and Policies (NREPP).

### “Establishing Evidence-Based Program for Poison Education”

Poison Control educators often work amidst large population bases and with limited funding. These constraints can make it difficult to scientifically implement public outreach and education. However, educating without the principles of evidence-based public health (EBPH) frustrates the effort to meet long-term health goals and inhibits sustainable models for improving health.

This session aims to present educators with well-established resources that can make the EBPH process actionable. It will define what EBPH is and what it involves—highlighting the need to use the best qualitative and quantitative data available, the need to use behavioral science theory, the need to listen and learn from the community, and the need to evaluate public health efforts.

Participants will also learn about various planning tools and online courses that introduce and affirm the practice of EBPH. These are free resources designed by experts in the field of public health. The resources help educators obtain the best available scientific evidence and serve to improve data seeking acumen as well as assistance in implementing EBPH.

Finally, participants will review a public health campaign created by a poison control educator who employed the principles of EBPH. The campaign will be dissected in stages, starting from community engagement to evaluation. Educators will be challenged to relate their own educational efforts to the domains of EBPH and to the campaign case study. At the end of the session, educators should be better equipped to draw on the principles of EBPH to set up their outreach and public health initiatives.

### “Achieving Cultural Appropriateness in Health Education Program”

The multicultural makeup of the US presents special challenges for poison center educators, whose job requires translating and communicating a wide array of health information. Cultural appropriateness refers to the awareness of how other cultural groups differ from one's own, and puts this into action through the tailoring of public health interventions to specific cultures. Sensitivity to culture is critical in influencing people's health beliefs and behaviors, and ensuring effective delivery of quality health information.

To provide programs and materials that are culturally appropriate, poison educators must be able to identify and describes different cultures within a given population, understand how each relates to health behavior, and apply this knowledge in planning and development activities. Strategies used to achieve cultural appropriateness in health education programs vary widely.

This session will focus on functional strategies to enhance cultural appropriateness in poison prevention education and outreach.

### “Poison Prevention Response to the Opioid Epidemic”

While there are many solutions to the opioid problem that fall outside of poison center expertise and responsibility, educators can learn about best practices relevant to poison centers from fellow educators. This session features 4 educator-panelists, each with a unique perspective on opioid crisis solutions:

- How a relationship with a needle exchange and clinic pilot project informed and shaped one educator's outreach around opioids
- Take Back Your Meds campaign
- A poison center's role in a new state law requiring all EMS to report suspected opioid overdoses and naloxone administration to the poison center
- Expansion of an opioid assistance and referral line services within a poison center to include education on overdose prevention in medically underserved areas

Exposure to programs and strategies which address opioid solutions allows for educators to adopt similar programs and strategies, or adapt them to fit their populations, or spark new ideas of their own.

### CONTINUING EDUCATION

This program was designed in accordance with the Accreditation Council for Pharmacy Education Quality Criteria and the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education.

Application has been made to the National Commission for Health Education Credentialing, Inc. (NCHEC).

Over 26 hours of continuing education will be available for physicians, pharmacists and nurses, as well as approximately 13 CHES hours for educators.

Registration must include full payment in US Funds to be processed. A \$30 fee is charged for any returned check or declined credit card.

Purchase Orders: Purchase Orders must be received with registration by the conference date and include the P.O. number, invoice address, tuition, approval signature, and contact name, e-mail address and phone number.

Confirmation of registration will be sent via email.

Cancellations received after August 19, 2019 will be assessed a \$150 processing fee.

Spouses and significant others may not attend the Opening Reception unless the Guest fee has been paid. If you have a disability requiring an auxiliary aid or special service while attending this meeting, please call (925) 361.4813, no later than September 6, 2019.

\* Includes both physician and non-physician (e.g., PharmD, PhD) currently enrolled in a medical/clinical toxicology fellowship program

\*\* Armed Forces of the United States of America (US Army, USN, USMC, USAF, USCG)
