

Poison Control Center Pharmacist Position Available: **Clinical Coordinator Pharmacist (Pharmacist SR EX 007932)**

Duties: The California Poison Control System provides over the phone information to California health care professionals, and to the general public, regarding the diagnosis, assessment and treatment of poisoning or potential poisoning. In addition to staffing the hotline, this position will assist with training Poison Center hotline staff, as well as create, implement, and sustain Quality Assurance programs.

Employment is with the UCSF School of Pharmacy. Opportunities exist for research and academic publication.

The Fresno-Madera Region of California's Central Valley is a culturally diverse and sophisticated community, where residents enjoy small-town values with big-city amenities in close proximity to world-renowned hiking, skiing, and coastal regions. Enjoy the best of what our great state has to offer in "the Barcelona of California."

Required Qualifications

- Pharm.D. Degree, and CA Licensed Pharmacist in good standing currently or by the time of starting.
- Candidates must have a CSPI OR DABAT
- Minimum of 2 years of experience in clinically-oriented pharmacy practice
- Demonstrated active pursuit of certification by the American Board of Applied Toxicology (ABAT). Required to obtain certification within 3years of hiring.
- Excellent drug information skills and knowledge of pharmacology, toxicology, physical chemistry and pathophysiology
- Experience and a thorough understanding of potential interactions between drugs and disease states
- Written and verbal communication skills must be superb in English and adaptable to situations involving callers ranging from children and the lay public to healthcare professionals
- Will work an average of 80 hours over each 2-week period, which includes sharing days, evenings, nights, weekends and holidays. Must be available to work onsite in Madera, CA.

Preferred Qualifications

- Post graduate or clinical pharmacy residency or fellowship training
- Certification by the American Board of Applied Toxicology (DABAT)
- Involvement in scholarly activities
- Multilingual
